FMCSA Violation Profile

By State and Fleet Size

2024-2026

Fleet-Connection.com

sherb@fleet-connection.com

Published May 2026

Methodology & Notes

This report ranks each state's FMCSA violation profile, normalized to a per-vehicle rate so that states with very different fleet sizes can be compared on equal footing. Violation counts come from the FMCSA dataset for the 22-month period May 2024 through February 2026. Vehicle counts come from FMCSA fleet registrations broken out into three buckets: small (1–10 vehicles), medium (11–100), and large (100+).

Rate calculation. State rate = state violations of that type ÷ state vehicles in that bucket, multiplied by 12/22 to express on a per-year basis. National rate uses the same method aggregated across all 50 states.

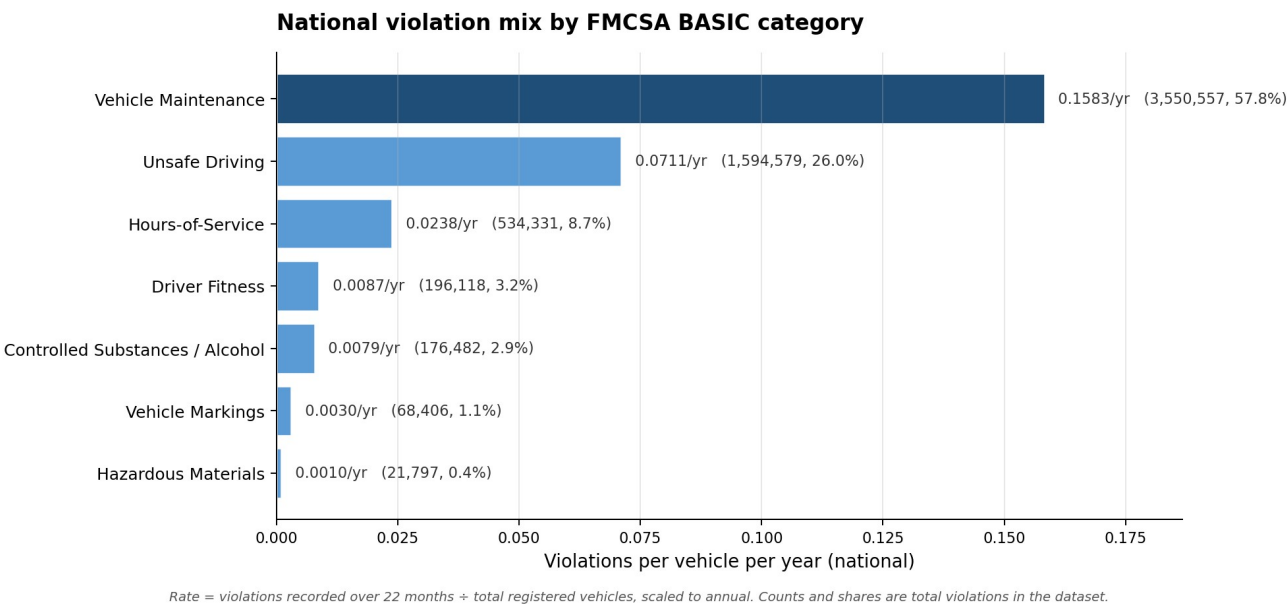

Color coding. In each state table, the State rate column is colored **red** if it exceeds the national average for that violation type and fleet size, and **green** if it falls below. The 'vs. National' column shows the multiplier.

What's in this report. An executive summary section follows with four overview charts (national mix by FMCSA BASIC category, a state-by-category heatmap, monthly trend lines, and a fleet-size slope chart). After that, 50 state sections each present four tables — top 10 violations for small, medium, large, and combined fleet sizes.

Caveat. States with heavy roadside-inspection programs may show elevated rates partly because more violations are detected, not necessarily because carriers are inherently less safe. Compare states with that lens in mind.

Executive Summary — Charts

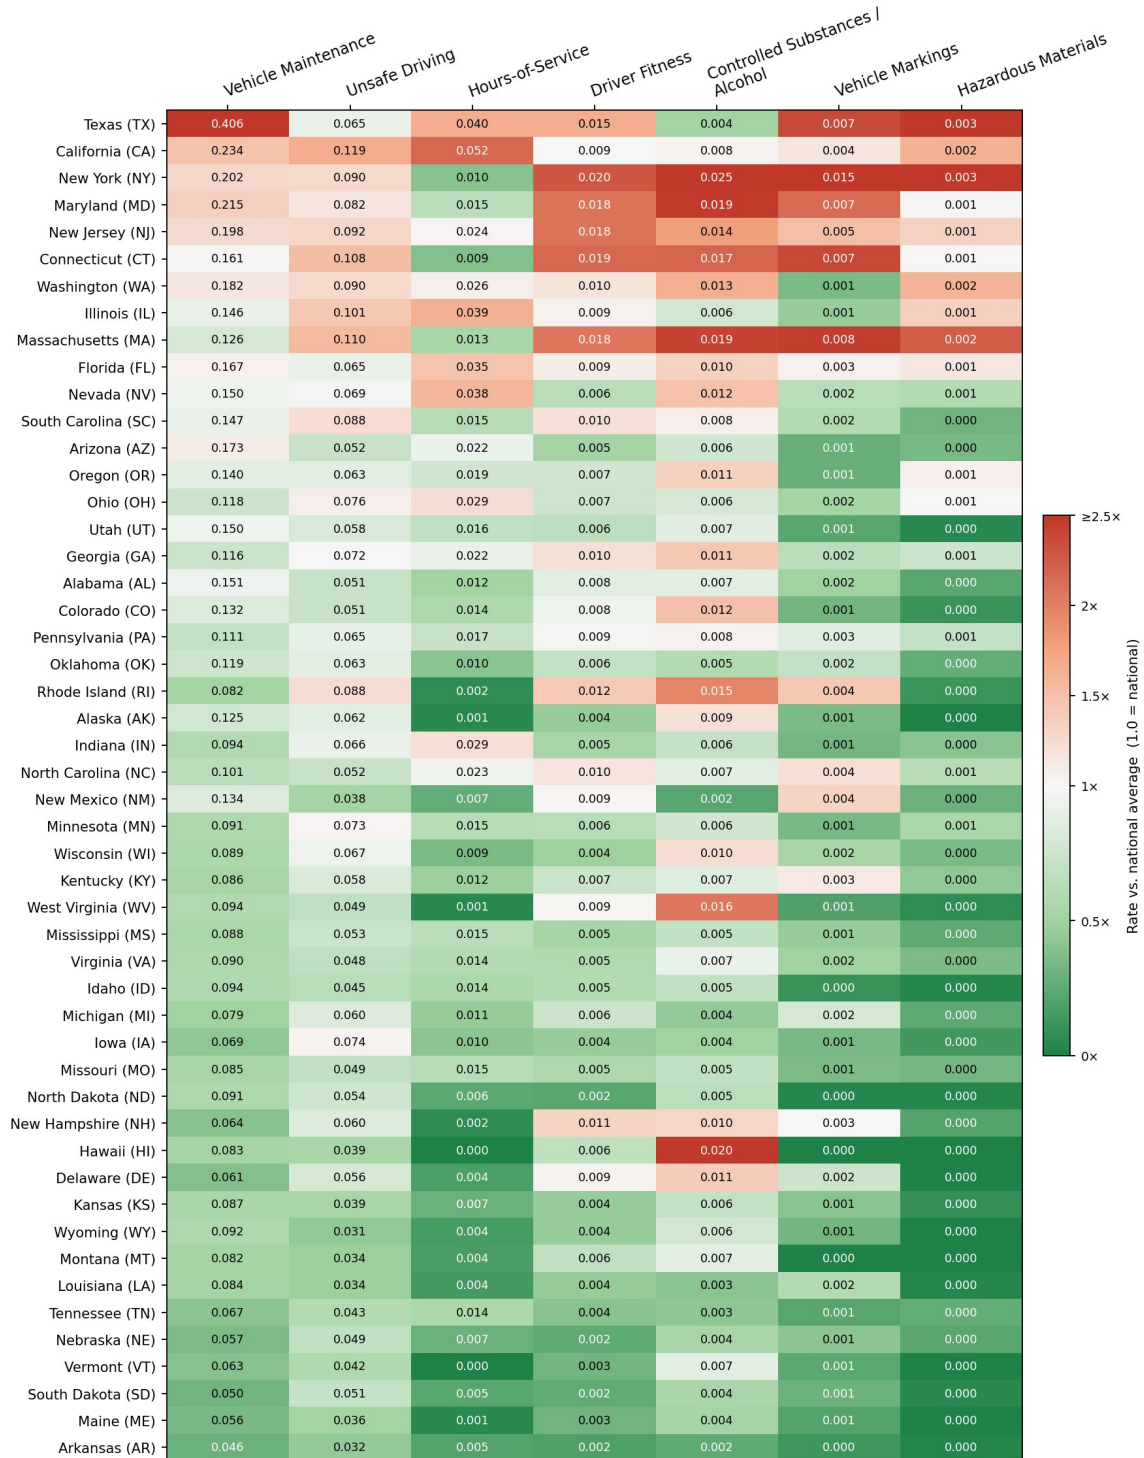

National violation mix

Annualized violation rate per vehicle for each of the 7 FMCSA BASIC categories. Vehicle Maintenance accounts for ~58% of all violations.

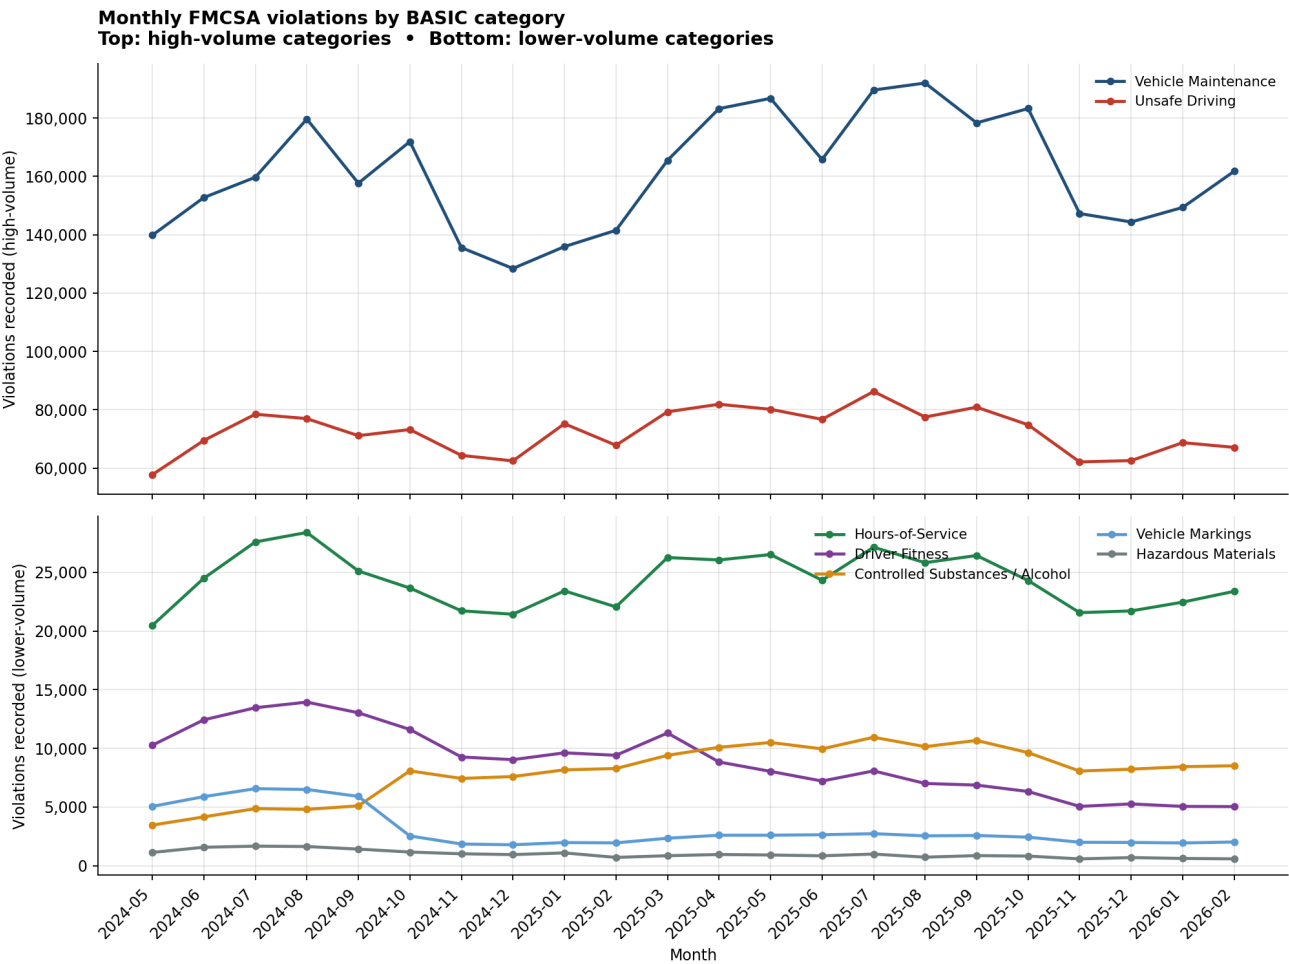

State × BASIC category heatmap

FMCSA violation rate by state and BASIC category (annualized viol / vehicle / yr)
Cells colored by ratio to national average; numbers are actual rates. States sorted by total rate.

Per-vehicle rate for each state and category. Cells colored by ratio to national average (red = above, green = below). States sorted by total violation rate.

Monthly trends by category

Monthly totals from May 2024 through February 2026. Counts are absolute (vehicle counts are not available monthly), so rate-style normalization is not applied to this view.

Monthly absolute violation counts. Vehicle Maintenance and Unsafe Driving on top; the five smaller categories on the bottom. Note the apparent reporting discontinuity in late 2024 for the smaller categories.

Alaska (AK)

Top 10 violations by fleet size, May 2024 – February 2026

Small fleets (1–10 vehicles)

6,937 registered vehicles in this bucket • 3,778 total violations recorded

Rank	Violation type	State rate (per veh/yr)	National rate (per veh/yr)	vs. National
